

SHOOTER RESPONSIBILITY

Be ready to shoot with all magazines loaded. (Or speedloaders for revolvers.) Step into Shooting Box, face downrange. Load and make ready. Take gun out of holster to load magazine into gun. Do NOT put in magazine while gun is in Holster.

Keep finger out of trigger guard. If topping off a magazine, load chamber first, put gun "on safe", drop the magazine, then holster. Put a round in the magazine, take gun from holster, re-insert magazine and re-holster.

Put hands UP, wrists above shoulders, no creeping or movement after command. At command Shooter(s) Ready, must remain still. Any movement prior to start signal will result in a false start and loss of bout (or 2 second penalty if time only scoring).

If you hear the command **STOP!** Do so immediately. Follow RO Commands.

Keep Muzzle Downrange! When finished shooting, take finger out of trigger guard. Drop magazine, store in pouch or place on table. Then rack slide or open cylinder and "Show Clear" chamber or cylinder to RO. Rack slide from rear serrations. Do NOT place hand over port to catch live round.

Release slide or close cylinder. Point muzzle downrange, press trigger and drop hammer down or use hammer drop. Place gun in holster or shooting bag.
